| Series | 300 | Instruction |
| Section | 320 | General Organization Plan |
| Policy | 324 | School Closing |

School may be closed when weather conditions are such that it is likely that a substantial number of students will not be able to attend or it may be closed early in the day when weather conditions indicate that buses may not be able to return students to their homes.

The District Administrator or designee, in the absence of the District Administrator, shall determine whether or not school shall be closed or whether or not there shall be an early dismissal.

Bus drivers may not make individual decisions as to whether or not they shall make their runs, but they may use their discretion as to whether or not they travel some roads that may be especially treacherous.
